***DETAILED ACTION***

1. Applicant's amendments filed August 10, 2000, December 18, 2000, March 2, 2001 and September 14, 2001 are acknowledged and have been entered. Claims 1-14 and 29 have been canceled. Claims 15-28 are now pending in the present application.

***Sequence Requirements***

2. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 C.F.R. § 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 C.F.R. §§ 1.821-1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Please see attached RAW SEQUENCE LISTING ERROR REPORT (processed by STIC on 10/05/01).

Full compliance with the sequence rules is required in response to this office action. A complete response to this office action should include both compliance with the sequence rules and a response to the Restriction Requirement set forth below. Failure to fully comply with both these requirements in the time period set forth in this office action will be held non-responsive.

*Election/Restrictions*

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A. Claim 18; applicant should elect one derivative with regard to "an amino acid residue has been substituted with a different amino acid residue" and set forth the sequence by SEQ ID NO.

Species B. Claim 19; applicant should elect a derivative with regard to a hydrophobic amino acid residue being substituted with a different hydrophobic amino acid residue. Please define which hydrophobic amino acid residue is being substituted, what the new hydrophobic amino acid residue is, and set forth the sequence by SEQ ID NO.

Species C. Claim 20; applicant should elect a derivative with regard to a basic amino acid residue being substituted with a different basic amino acid residue. Please define which basic amino acid residue is being substituted, what the new basic amino acid residue is, and set forth the sequence by SEQ ID NO.

Species D. Claim 21; applicant should elect a derivative with regard to a aromatic amino acid residue being substituted with a different aromatic amino acid residue. Please define which aromatic amino acid residue is being substituted, what the new aromatic amino acid residue is, and set forth the sequence by SEQ ID NO.

Species E. Claims 22 and 25 set forth different formulas; applicant should choose either claim. Further, if Applicant elects claim 25, Applicant should elect a specific derivative with regard to claims 26-28 (similar to species elections B-D as set forth above).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the derivative of claim 15 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
